

dotnamecpp::logging
::LogStream::operator<<

dotnamecpp::logging
::LogStream::operator<<

dotnamecpp::logging
::LogStream::LogStream

```
graph LR; A[dotnamecpp::logging::LogStream::operator<<] --> C[dotnamecpp::logging::LogStream::LogStream]; B[dotnamecpp::logging::LogStream::operator<<] --> C;
```

The diagram consists of three rectangular boxes. On the left, there are two white boxes with black borders, each containing the text 'dotnamecpp::logging' followed by '::LogStream::operator<<' on two lines. On the right, there is a single gray box with a black border containing the text 'dotnamecpp::logging' followed by '::LogStream::LogStream' on two lines. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating a relationship or mapping between the two operator overloads and the LogStream constructor.
